Senzati:-
Derived from the Italian phrase Senza (without) Limiti (limits)

Designed and built in Great Britain.
Underpinned with superb German Engineering.
WELCOME TO SENZATI

We design and build the world's finest people carriers.

Senzati combines fine craftsmanship with the very latest technology to create a vehicle that offers the discerning customer the ability to work and relax in sophisticated comfort.
Senzati’s significant investment in our world class vehicle ensures that our customers experience is second to none.

Senzati began with one goal...

...to develop the very best vehicle for road travel. It had to offer its passengers the space and luxury usually found in a good sized private jet, while also being able to access city centre venues and be discreet in its external appearance.

We believe passengers should not be compromised by cramped road transport with room for only a couple of guests and limited conveniences. The Senzati Jet Sprinter provides luxury transport for 8 people (plus the driver) with room for 12 large suitcases or a rear bathroom.
A discerning owner should not expect the access to their luxury vehicle to be obstructed by the seating arrangements, a recurrent problem faced by all other manufacturers.

Senzati has uniquely addressed this challenge by relocating the side-entry door rearwards. This ensures unobstructed access to the vehicle whilst maintaining privacy for the rear facing passengers.

The window configuration has naturally been altered to perfectly complement each seating position. The remanufactured passenger compartment is further enhanced by a 2-metre glass sunroof. All passenger window apertures, including the glass roof, have the option of switchable LCD double glazing and integral individual electric black-out window blinds.

From the new mid-ships cabin door & two metre glass roof to the sumptuous British designed & built seats & furniture, every Senzati Jet Sprinter’s detail is crafted to the highest possible standards.

ATTENTION TO DETAIL

Senzati have an obsessive pursuit of perfection. Conceived and built from the ground upwards, every aspect of the Jet Sprinters design has been optimized to create a best-in-class environment.
The Senzati Jet™ Sprinter is manufactured on a 5 ton chassis to ensure that even when highly specified and full of passengers & luggage it remains within legal & safe weight limits.

The Senzati Jet™ Sprinter is the only vehicle of its kind in the world to achieve European Type Approval as a passenger car (not a commercial vehicle or minibus).

In short, this means the vehicle does not require a Tachograph and is not electronically speed limited as with all other commercial vehicles.

Automotive legislation is subject to change and should be checked with the relevant authorities in the proposed country of use.
The perfect combination of British craftsmanship and dependable German engineering

THE PERFECT PLATFORM

Our preferred base vehicle is the Mercedes-Benz Sprinter.

Manufactured to impeccable Mercedes-Benz standards, using industry leading engineering and components and incorporating innovative design and technology, it is the perfect start point.

Utilising the 7G-TRONIC PLUS 7-speed automatic transmission, the new Sprinter is the first and only vehicle in its class to offer the smooth running characteristics and ride comfort of a passenger car.
PASSENGER COMPARTMENT

The flexibility of the Mercedes-Benz Sprinter platform allows us to adapt the interior design to specific client requirements.

Senzati views comfort and luxury as paramount and our emphasis is on substantial personal space to be able to stretch out and relax effortlessly. Privacy is assured as the driver’s cab is isolated from the cabin either by electric doors or a fixed bulkhead with 40” TV and centre console.

There are almost limitless options and layouts. Please contact us to discuss your specific ideas or requirements.
SECURITY
The Senzati Jet Sprinter is available armoured to B4+ standard. For further details please contact our sales team.
